

Backward flow analysis

```
...  
String MyDifficultPassw = "MyDifficultPassw";  
...  
SecretKeySpec sks = new SecretKeySpec  
                    (MyDifficultPassw.getBytes(), "AES");  
...
```

A diagram illustrating backward flow analysis. It shows two arrows pointing to specific lines of code. The first arrow points to the line 'String MyDifficultPassw = "MyDifficultPassw";'. The second arrow points to the line '(MyDifficultPassw.getBytes(), "AES");'. The text 'Backward flow analysis' is written in the top right corner.
